April 29, 1969.

Mr. Uldis Karins  
P.O. Box 165  
Wilmington, Del. 19899

Dear Mr. Karins:

Enclosed for your information and record are the data through March 14, 1969, that have been obtained from the Tybouts Corner sanitary landfill monitoring program. Samples are being collected weekly. From now on, the analyses will be transmitted to you on or about the first of each month.

You will note that no apparent pollution is indicated. Furthermore, you can be sure that if any pollution is detected, you will be advised of this immediately.

As you know, observation point number 1 was destroyed during February and number 4 was destroyed during March. Consideration should be given to replacing one or both of these points.

Thank you for your cooperation.

Sincerely yours,

*S. Varrin*
